↳ index)*24)*10, random_state=False,shuffle=False)
```

/opt/jupyterhub/anaconda/lib/python3.6/site-packages/ipykernel_launcher.py:7:

SettingWithCopyWarning:

A value is trying to be set on a copy of a slice from a DataFrame.

Try using .loc[row_indexer,col_indexer] = value instead

See the caveats in the documentation: https://pandas.pydata.org/pandas-docs/stable/user_guide/indexing.html#returning-a-view-versus-a-copy

import sys

1.2 SVR Trainen

```
[7]: #train the model:
svr = SVR()
svr.fit(X_train,y_train)

#make data plot ready:
test = np.arange(X_train.shape[0], X_train.shape[0]+X_test.shape[0])
train = np.arange(X_train.shape[0])
```

/opt/jupyterhub/anaconda/lib/python3.6/site-

packages/sklearn/utils/validation.py:72: DataConversionWarning: A column-vector y was passed when a 1d array was expected. Please change the shape of y to

```
(n_samples, ), for example using ravel().
    return f(**kwargs)
```

1.2.1 Plotje

```
[8]: %matplotlib notebook
plt.subplots(figsize=(10,5))
